

Boudoir Bottle

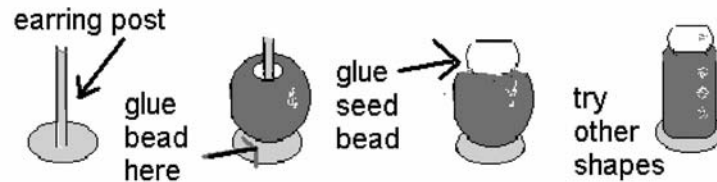

- by Susan Phillips

Materials

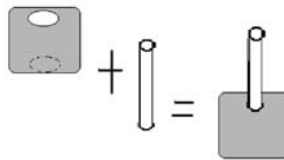

- 1 seed bead, 6mm or 8 mm round or oval bead
- 1 metal earring post for each bottle

Instructions

1. Use one seed bead and one metal earring post for each bottle.

2. Put a dab of glue on the inside of the base of the earring post and slip the large bead onto the post. Then glue a seed bead on top. Try a gold seed on top of a faceted bead and a gold post, or a silver seed on a coloured bead bottle.
3. For nail polish bottles, glue a silver bugle bead (the thin straw shaped beads) on top of a round 1 or 2 mm bead in nail polish colour.

4. Decals designed for fingernail art come in many colours and metallic shapes. Check your dollar store. These decals make great adornments for a dresser tray, or can turn a large plain bead into vases. Also good to decorate mini items such as jewelry boxes, dresser drawers, even dishes.
